

Advanced Modality Certification

Post-primary certification program in advanced modalities prepares students for a career in medical imaging as an MRI Technologist. Graduates are eligible to sit for the ARRT certification exam in Magnetic Resonance Imaging, RT(MR). The program offers online coursework and flexible clinical internship opportunities to assist the working Technologist in achieving certification. Admission to the certificate program is through a competitive selection process.

Learn today. Earn tomorrow.

Our dual application process includes the RRCC application (select AGS - Assoc in Gen Studies), an additional Medical Imaging online application, an interview, and a screening process (including background check & drug screen).

rrcc.formstack.com/forms/magnetic_resonance_imaging_program_application
Program applications are accepted year-round.

Pre-requisite or co-requisite to be completed prior to graduation:

RTE 2055 Multiplanar Sectional Imaging - 2 credits

In addition, applicants must be in good standing with the ARRT and be RT(R) registered.

Minimum of meeting the structured education requirement and 125 completed competencies needed to sit for the ARRT MR exam and program completion.
